FROM: Olney Patt, Jr., *Executive Director*

DATE: September 27th, 2005

SUBJECT: **Operation of the Lower Columbia Pools for the Autumn 2005 Treaty Fishery**

The Columbia River Inter-Tribal Fish Commission, on behalf of its member tribes the Nez Perce Tribe, the Yakama Nation, the Confederated Tribes of the Umatilla Reservation, and the Confederated Tribes of the Warm Springs Reservation, requests the following reservoir operations in Zone 6 (Bonneville to McNary dams) during the 2005 autumn Treaty fishery. Implement the following hydro-system operations during the ceremonial, subsistence, and commercial Treaty fishery times as established by the tribes and the Columbia River Compact.

SPECIFICATIONS: Implement the following operations as a hard system constraint as follows:

September 28th, 2005, 6 am, Wednesday, through 6 pm, September 30th, 2005, Friday.

Bonneville Pool: Operate the pool within a 1.0 foot band, near full pool (no lower than 75 ft).

The Dalles Pool: Operate the pool within a 1.0 foot band, near full pool (no lower than 158 ft).

John Day Pool: Operate the pool within a 1.0 foot band, near full pool (no lower than 263 ft).

JUSTIFICATION:

The 2005 autumn Treaty fishing season is of critical importance to CRITFC's member tribes. The escapement of an estimated **401,000** (at Bonneville Dam) adult fall Chinook (moderate-high rank) will create good harvest opportunities for tribal fishers. As of September 20th, 2005, there were 429 nets in the Zone 6 pools, as follows: 79 (18%) in Bonneville, 112 (26%) in The Dalles, and 238 (56%) in John Day. Tribal fishers will be exercising their treaty rights by participating in this harvest. Cultural and religious ceremonies will occur with the harvest of these salmon.

During a meeting at CRITFC's Law Enforcement Division in Hood River on September 2, 1999, tribal fishers explained the impacts of unstable pools and pools below full to the Treaty fishery to Colonel Mogren and Lt. Colonel Harshbarger. The tribal fishers explained that a pool fluctuation of 1.0 foot or more disrupts tribal fishery operations. Specific problems include: (1) increased local currents that sweep debris into fishing nets, (2) rapid 1-2 hour drops in water level will lead to entanglement of nets, (3) boat access problems, and (4) nets torn from their anchors. Nets and gear are costly to replace. Any delays or disruptions to tribal fishing operations caused by the excessive pool fluctuations in Zone 6 negatively impacts tribal incomes, food resources and cultural practices.

The fishers also stressed to Corps officials that the loss of fishing opportunity during the extremely limited treaty fishery cannot be replaced. Much of the tribal fishers' income and food is generated during the brief treaty fishing season, thus, any delays or disruptions to their fishing operations caused by the excessive pool fluctuations in Zone 6 negatively impacts tribal incomes, food resources, and cultural practices.

Implementing this request will assist the Federal operating agencies in meeting their federal trust responsibilities to the Columbia Basin treaty tribes. If this SOR cannot be accommodated, CRITFC's member tribes request a detailed written response from the federal operators, with justification, by Friday, September 30th, 2005.
