

COLUMBIA RIVER WATER MANAGEMENT REPORT

WATER YEAR 1997

This report on the water management activities is a joint product of the Federal and state agencies in the Pacific Northwest that actively participate in the management of the resources of the surface waters of the region. This years document is prepared in a series of PDF documents (basically the chapters from previous reports) that are linked together for quicker access by the viewer. By clicking on the desired topic listed below the reader can jump directly to the desired topic without having to page through the entire report. Inside each chapter will be another index to the chapter for quick access to the section desired.
