DATE: June 9, 2016

SUBJECT: **Operation of the Lower Columbia Pools for the summer 2016 Treaty Fishery**

The Columbia River Inter-Tribal Fish Commission, on behalf of its members, the Nez Perce Tribe, the Confederated Tribes of the Umatilla Indian Reservation, the Confederated Tribes of the Warm Springs Reservation of Oregon, and the Confederated Tribes and Bands of the Yakama Nation, requests the following reservoir operations in "Zone 6" (BON to MCN dams) during the summer 2016 Treaty fishery. This effort supports the 2016 ceremonial, subsistence, and commercial Treaty fishery times as set by the tribes and the Columbia River Compact.

SPECIFICATIONS: Implement the following pool operations, as follows:

**Thursday, June 16, 2016, 6 am, through Saturday, June 18, 2016, 6 pm**

**Monday, June 20, 2016, 6 am, through Thursday, June 23, 2016, 6 pm**

**Monday, June 27, 2016, 6 am, through Thursday, June 30, 2016, 6 pm**

**Bonneville: Operate the pool within a 1.5 foot band during the treaty fishing period.**

**The Dalles: Operate the pool within a 1.5 foot band during the treaty fishing period.**

**John Day: Operate the pool within a 1.5 foot band during the treaty fishing period.**

CRITFC will notify the Corps with specific times for the tribal fishery after a Compact hearing.

## JUSTIFICATION:

The 2016 summer treaty fishing season is of critical importance to CRITFC's member tribes. The run sizes (Columbia River at Bonneville Dam) of an estimated 89,000 (above average) adult summer Upper Columbia chinook, 100,000 sockeye (below average), and 265,400 steelhead (below average) will create harvest opportunities for tribal fishers who will exercise their treaty rights by participating in this harvest using platform and gillnet fishing methods. This harvest will provide for the cultural, religious, and economic needs of the treaty tribes.

CRITFC will sponsor net flights each week to count the nets in each Zone 6 pool. The survey data will be shared with COE-RCC staff by early afternoon of the flight day.

Achieving good river conditions through managed river operations during the treaty fishery have been the basis of past litigation that have been supported by federal courts and are consistent with the trust and fiduciary responsibilities that the federal operators have with respect to CRITFC's member tribes. Good river conditions during the treaty fishery are also consistent with the spirit of the 10-year Memorandum of Agreements signed by tribal and Corps, BPA, and USBR officials.

In past meetings with Corps officials, tribal fishers have explained that a pool fluctuation of more than 1.5 foot disrupts tribal fishery operations. Specific problems include: (1) increased local currents that sweep debris into fishing nets, (2) rapid 1-2 hour drops in water level will lead to entanglement of nets or change local currents that affect fishing success, (3) boat access problems, and (4) nets torn from their anchors if pools are raised after nets are set. Nets and gear are costly to replace and may become lost.

Any delays or disruptions to tribal fishing operations caused by the excessive pool fluctuations in Zone 6 can negatively impact tribal incomes, food resources and cultural practices. Much of the tribal fishers' annual income and food is generated during the brief treaty fishing season. The fishers have expressed to Corps officials that the loss of fishing opportunity during the extremely limited treaty fishery period cannot be replaced.

If this SOR cannot be accommodated, CRITFC requests a verbal response with an explanation from the federal operators by COB, Friday, June 10, 2016. Thank you for considering this request. Please contact Kyle Dittmer or Stuart Ellis should you have any questions at (503) 238-0667.
