

Alternative A: Remain on minimum releases through the heatwave.

Analog Year 2016

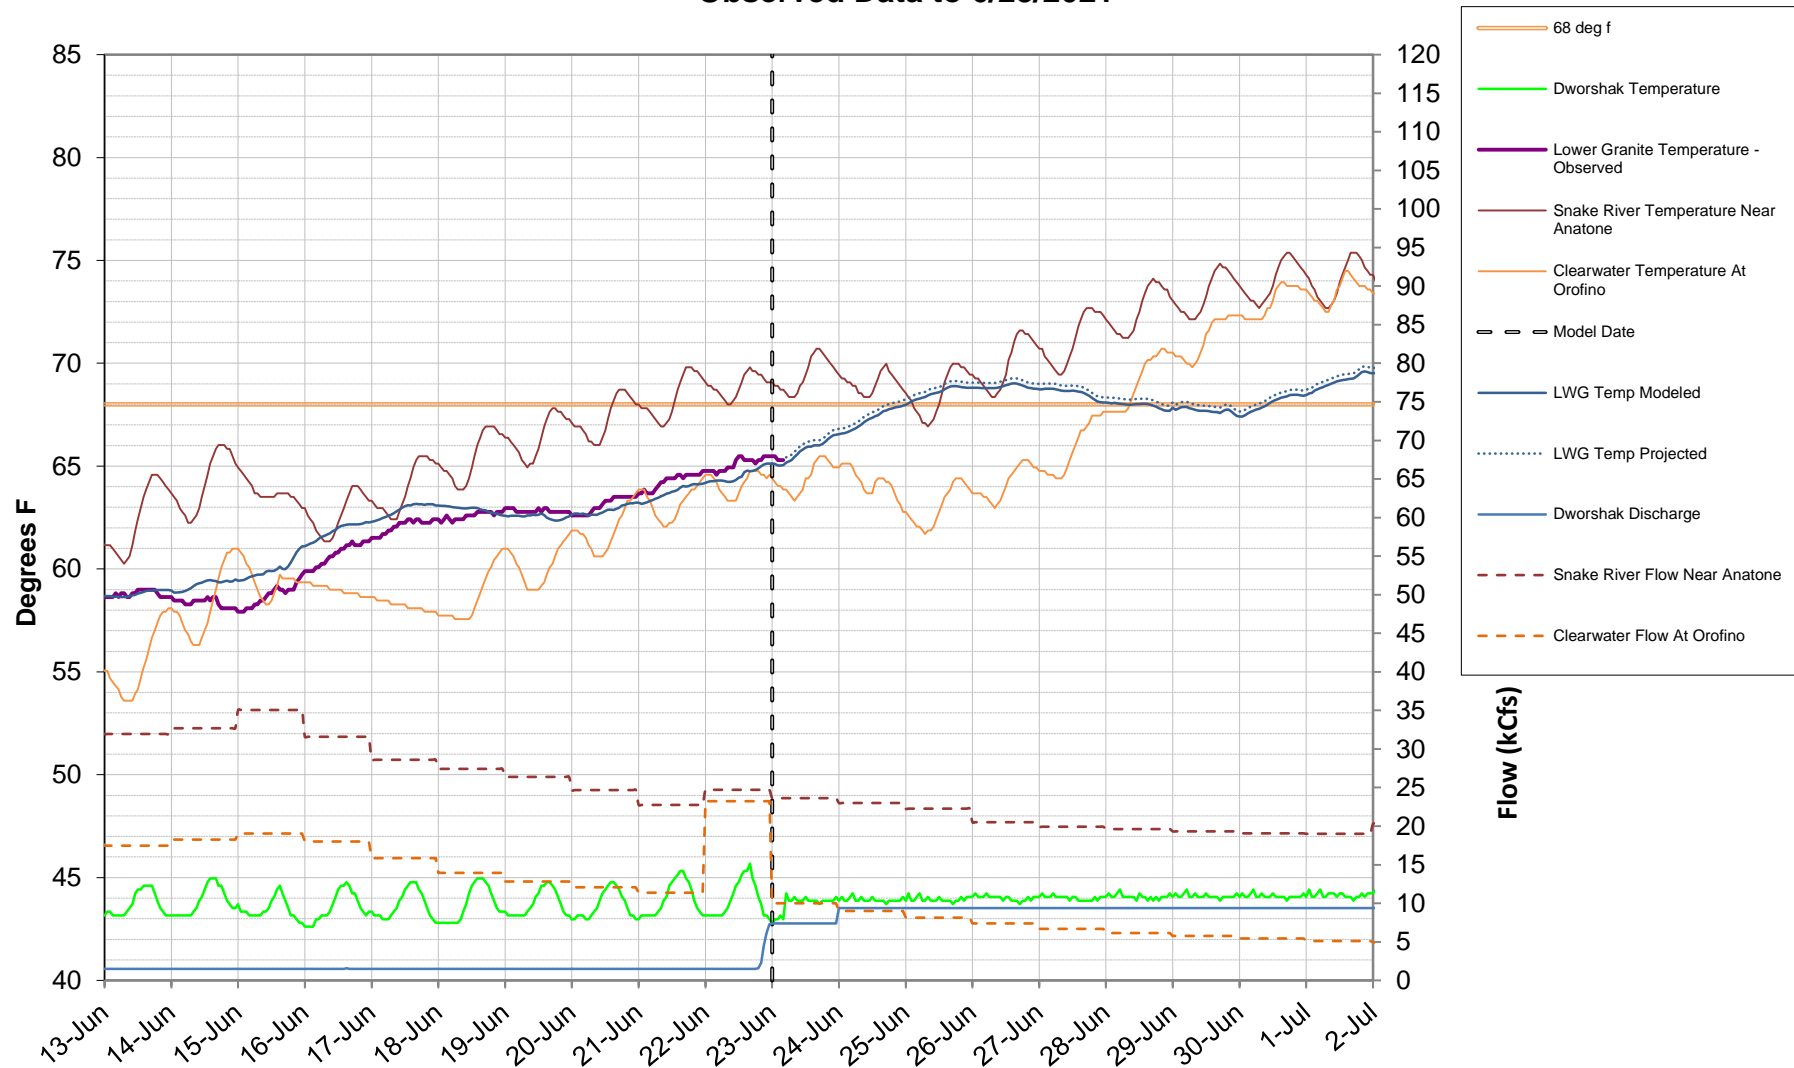

Water Temperature Comparisons Model from 6/13/2021 to 7/2/2021 Observed Data to 6/23/2021

Alternative B: Conservatively increase releases to maximum powerhouse capacity.

Analog Year 2016

Water Temperature Comparisons Model from 6/13/2021 to 7/2/2021 Observed Data to 6/23/2021

Alternative C: Spill maximum allowable while remaining below 110% TDG limit.

Analog Year 2016

Water Temperature Comparisons Model from 6/13/2021 to 7/2/2021 Observed Data to 6/23/2021
