

## **FPOM - ADULT FISH PASSAGE FACILITIES TASK GROUP**

10/28/04

Chairman – Larry Basham, FPC

Participants – 1-State Biologist, 1-Federal Biologist, 1-Project Biologist, COE,  
1-District Operations Biologist, COE, Other – as required.

**Purpose** – The Adult Fish Passage Facilities Task Group is established to deal with specific issues relating to passage facilities that have or potentially affect passage of adult salmon or other fish at Walla Walla or Portland District dams. The guidelines will be patterned to assure that fish facilities will meet standard criteria or operations that will safely pass fish at the COE projects. After an assignment has been given by FPOM or FPAC for example, the chairman will establish a team of personnel to task the problem(s) and meet resolution of the issue within a short turn-around as possible.

**Current Problem to Resolve:** None at present.

**Current Goal:** The specific issue will be written up with collaboration amongst the Team members. The issue will include recommendations and present potential solutions of the issue along with potential gains for adult fish passage. Turn-around on an issue should be as rapid as possible.

**Status:** No action items received as of October FPOM meeting.

**Proposed Schedule:** On hold.
