Since 2005 the work above has been a portion of the:

Integrated Status and Effectiveness Monitoring Program (ISEMP)

<http://www.nwfsc.noaa.gov/research/divisions/cbd/mathbio/isemp/index.cfm>

Background

The Integrated Status and Effectiveness Monitoring Project (ISEMP) seeks to design, implement, test, and evaluate Status and Trends and Effectiveness Monitoring programs for salmon and steelhead populations and habitat. ISEMP pilot projects are being developed in the following Interior Columbia basins: John Day, Salmon, Wenatchee, and Entiat.

BPA funded program. NMFS supported (Northwest Fisheries Science Center).
Multiple agencies and tribes involved.
