Date: Wednesday, May 05, 2021 12:48:20 PM

Ok...I just gotta get back on my bass/walleye removal soapbox again. Can we have this on the FPOM agenda?

Subject: [Non-DoD Source] RE: NPMP Activity Report - Week 15, 2021

Hello Mr. Cordie,

I did some further exploration and here is what we show as the estimated breakdown of the game fish category for the electrofishing effort thus far below Bonneville Dam (BBDC) and in Bonneville pool (BONC).

Reach	CommonName	ScientificName	Estimate
BBDC	Mountain Whitefish	Prosopium williamsoni	536
BBDC	Yellow Perch	Perca flavescens	302
BBDC	Smallmouth Bass	Micropterus dolomieu	71
BBDC	trout	Salmonidae spp.	49
BBDC	Channel Catfish	Ictalurus punctatus	33
BBDC	unidentified sunfish	Lepomis spp.	9
BBDC	Walleye	Sander vitreus	5
BBDC	catfish	Ictaluridae spp.	1
BBDC	Pumpkinseed	Lepomis gibbosus	1

Reach	CommonName	ScientificName	Estimate
BONC	Smallmouth Bass	Micropterus dolomieu	1571
BONC	Yellow Perch	Perca flavescens	58
BONC	unidentified sunfish	Lepomis spp.	35
BONC	Walleye	Sander vitreus	9
BONC	Mountain Whitefish	Prosopium williamsoni	8
BONC	trout	Salmonidae spp.	4
BONC	bullhead	Ameiurus spp.	4
BONC	catfish	Ictaluridae spp.	2
BONC	Pumpkinseed	Lepomis gibbosus	2

Thanks,
Mac Barr

Subject: RE: NPMP Activity Report - Week 15, 2021

Hello Mr. Cordie,

I can provide you with more information on species breakdown of the category "game fish" at a later date if you would like. As you know, our field season is currently underway. All staff are rapidly acquiring data and the circulated Activity Reports provide a snapshot of this raw data. Before providing you with further details it would be best for us to have the opportunity to perform quality assurance and control checks and provide reviewed data.

Further, during electrofishing for tagging activities (those activities reported on thus far) we only handle Northern Pikeminnow and Walleye so it's important to understand that counts of all other species, including encounters with all other game fish are estimates of non-handled fish observed while our primary objective is to catch and tag Northern Pikeminnow to estimate exploitation in the Sport Reward Fishery.

That being said, I have been in the field with the crew thus far and anecdotally, much of the early season incidental catch for game fish was dominated by Mountain Whitefish (which I found surprising and generally do not recall them being so abundant below Bonn and in Bonn pool). Further up river, I expect the reservoir game fish composition will likely shift to smallmouth and walleye as you suggest.

Under Oregon regulations game fish include; salmon and trout, shad, whitefish, bass, bluegill, pumpkinseed, crappie, sunfish, catfish, perch.

Thanks,
Mac Barr

Hi Mac

Would you be able to answer Mr. Cordie's question?

Thanks
Craig.

[Caution]: This email originated from outside of PSMFC. Do not follow guidance, click links, or open attachments unless you recognize the sender and know the content is safe.

Thanks for the report Craig. I assume most of the game fish are bass and walleye. Any way we can access that data?
