

Change Request Number: 09AppG002

Date: June 30, 2008

Proposed by: Tom Lorz CRITFC

Location of Change- FPP G-2, 4.2

Proposed Change: Change 4.2. *Sampling will be permitted 1-day per week from 0600-1000 when water temperatures exceed 70°F to allow for mandatory steelhead sampling to*

Sampling will be permitted up to 4 days per week from 0600-1000 when water temperatures are between 70°F and 72°F to allow for mandatory steelhead sampling.

Reason for Change: To better meet the needs for data used by the US v Oregon parties and for the US/Canada Treaty fisheries groups in setting harvest limits and make management decisions. Currently large portions of the run are missed during these temperature outages making it difficult to estimate ocean abundance and stock specific escapements for fall Chinook for different critical population groups that drive decision by the harvest managers.

Comments from others: FPOM requested the hours be kept the same (0600-1000). An upper limit temperature needs to be added as well. This request doesn't include picket lead operation.

Final action: Mackey made the changes to the request. FPOM approved the increase in sample days at BON.
