

FPP Change Form

Change Request Number: 10BON007

Date: 13 November 2009

Proposed by: NWP

Location of Change: Table BON-3

Proposed Change:

Table BON-3. Adult fish counting schedule.

Period	Counting Method
January 1 – March 31	Video count 0400–2000 PST
April 1 – October 31	Visual count 05400-21000 <u>DPST</u>
November 1 - December 31	Video count 0400–2000 PST
June 15 – September 30	Lamprey Video count 2100-0500 DST

Reason for Change: Due to the changes in Daylight savings time, all visual counting will be during DST.

Comments from others:

NWW (Moody)- Why are we changing these? Are we changing PST to DST at different times. The contract has enough wording in it to cover this time change. If we make it consistent PST as in the contract then we already know to adjust for DST. I do not want any confusion on this in the future between the fish counting contract and the FPP. Keep it one reference of time PST. Do not change it.

BON Fisheries- Project Fisheries is fine with the changes.

NWW- Add in the lamprey counting hours.

Record of Final Action: Approved at December FPOM.
