

**Change Request Number: 11BON010**

**Date:** 11/3/10

**Proposed by:** BON Fisheries

**Location of Change:** BON 2.4.2.5.a.5.

**Proposed Change:**

5. Operate the outfall avian cannons from March 1 through ~~August 31~~ November 1. ~~During August, avian cannons may be shut off if project observes no predatory birds at the outfall, and coordinates through FPOM. If birds reappear at the outfall, cannon operation will resume and FPOM will be informed.~~ The cannons will be operated 24 hours/day during fish passage season.

**Reason for Change:** Cormorants and gulls have repeatedly moved into the JMF outfall area when the hydrocannon has been shut off in September or October. Fisheries would like to keep it operating until smolt monitoring and truck releases from upriver have concluded for the year.

**Comments from others:**

NOAA Fisheries- Agree with the change.

USFWS- support

**Record of Final Action:** approved at 21 January 2011 meeting.
