

FPP Change Form

Change Request Number: 11BON003

Date: 6/25/10

Proposed by: BON Fisheries

Location of Change: Table BON-9

Proposed Change:

Table BON-9. Bonneville Dam first powerhouse weir gate requirements.

Weir Gate	Submergence Requirement	Differential Requirement	Sill Elevation
1	>8'	1'-2'	8.5'
2	>8' *	1'-2'	2'
64	8'-8.4'	1'-2'	2'
65	8'-8.4'	1'-2'	8.5'

~~* When tailwater is <13.5', the 8' submergence requirement can not be satisfied due to pressure limitations on the AWS conduit.~~

Reason for Change: Correct outdated language. WG 2 is programmed to maintain >8' submergence and entrance head differential, it does not adjust to AWS conduit pressure.

Comments from others:

Record of Final Action: Approved at August 2010 FPOM.
