### Comments from others:

Due to discussion at FPOM and additional information as to how U1 chaingates would be operated, the proposed PH1 unit priority changes (located in the February FPOM agenda) for fish passage season were retracted. The changes proposed for September- November (while STSs are installed) were discussed and approved by FPOM. The members agreed that units with STSs should be priority units and those units will be U1 and U2 for 2009.

### Record of Final Action:

At the February FPOM, the members in attendance agreed to the unit priority change for PH1 while the STSs are installed.

The changes above were approved and implemented.
