

Draft FPP Change Form

9/14/07

Change Request Number: 08BON_003

Date: 1/31/2008

Proposed by: Project Fisheries

Location of Change

Bon section 8.

Proposed Change:

Change to read as follows:

8. Response to Hazardous Materials Spills. Bonneville Project's guidance for responding to hazardous substance spills is contained in its Emergency Spill Response Plan. This guidance will be followed in case of a spill.

8.1. Project Fisheries will be contacted as soon as possible after a hazardous material release and prior to any modification to fishway operations. The project biologist will in turn contact the CENWP-OD biologist and FPOM. Attempts should be made to first contact the project biologist on duty. During fish passage season there is a project biologist on duty seven days a week. If a project biologist cannot be reached by radio or in the office, attempts to contact Project Fisheries will occur in the following order:

1. Ben Hausmann- home and mobile numbers are available in the Control Room.
2. Jon Rerecich- home and mobile numbers are available in the Control Room.
3. Tammy Mackey- 503-808-4305 (Portland Office), mobile phone number is available in the Control Room.
4. Kasey Welch- mobile number available in the Control Room.

Reason for Change:

This would allow for easy access to spill information and provide consistency between NWP projects.

Comments from others:**Record of Final Action:**

Language changed as proposed.
