

Change Request Number: 11JDA004

Date: 01/11/11

Proposed by: David Wills

Location of Change: Section 1.2.2 for JDA

Proposed Change: Sturgeon and bull trout are also counted and recorded on the WDFW fish counters' daily summary sheet comments section, ~~and these data are summarized in the Annual Fish Passage Report~~, but do not appear on the Corps daily website total due to relative infrequency of passage. These data are posted in the Miscellaneous Fish Counts report during the passage season (updated periodically during the season) found on the Corps' web site, and summarized in the Annual Fish Passage Report.

Reason for Change: Accurately reflects current process.

Comments from others:

Record of Final Action: approved 21 January 2011.
