

Draft FPP Change Form

9/14/07

Change Request Number: 08JDA_009

Date: 10/4/2004

Proposed by: USACE Fisheries

Location of Change

JDA section 8.

Proposed Change:

Include a section about response to hazardous materials. This section is still being developed with NWP ECC. It would read something along the lines of:

8. Response to Hazardous Materials Spills. John Day Project's guidance for responding to hazardous substance spills is contained in its Emergency Spill Response Plan. This guidance will be followed in case of a spill.

8.1. Project Fisheries will be contacted as soon as possible after a hazardous material release and prior to any modification to fishway operations. The project biologist will in turn contact the CENWP-OD biologist and FPOM. Attempts should be made to first contact the project biologist on duty. During fish passage season there is a project biologist on duty seven days a week. If a project biologist cannot be reached by radio or in the office, attempts to contact Project Fisheries will occur in the following order:

1. Bob Cordie- home and mobile numbers are available in the Control Room.
2. Miro Zyndol- home and mobile numbers are available in the Control Room.
3. Bern Klatte -503-808-4318 or Tammy Mackey 503-808-4305

Reason for Change:

This would allow for easy access to spill information and provide consistency between NWP projects.

Comments from others:

Record of Final Action:

Language changed as proposed.
