

FPP Change Form

Change Request Number: 09overview001

Date: 10/31/2008

Proposed by: FPOM

Location of Change: Overview 1.10.2.1 FPOM Coordination

Proposed Change: Add wording to include the use of the Coordination Form. Insert a copy of the Coordination Form.

“The District biologist will then provide essential information to the fish agencies, tribes, and other affected interests as appropriate, *through the use of the Coordination Form (below), and, if necessary,* by telephone call with an e-mail follow-up. Information for planned activities should be provided at least two weeks in advance to FPOM representatives for review. For unanticipated but non-emergency activities such as equipment failures, information should be provided at least three workdays in advance. Emergency coordination may be performed immediately prior to or subsequent to the required action (see section 1.2). Information provided to affected interests will include a summary of the problem, location, date and time, analyses of potential impacts to salmon stocks, and potential alternative actions. The affected interests should in turn respond *by email, in person, or by phone. The response will be documented on the Coordination Form, sent to FPOM and filed for future reference.* A District biologist will forward the decision to project personnel, and in some cases, RCC will issue a teletype to the project for approved activities.”

Reason for Change: To provide a Coordination Form for interested parties and to formalize the use of the form for coordination issues.

Comments from others: insert “through the use of the Coordination form...” The form is not optional.

Record of Final Action: Approved with changes at 04 December FPOM meeting.
