

FPP Change Form

Change Request Number: 09overview002

Date: 1/8/2009

Proposed by: G. Fredricks

Location of Change: Overview 1.10.2.2

Proposed Change: remove the following language:

“The party responsible for the action will prepare, and e-mail, a memorandum to the NOAA Fisheries point of contact responsible for activities at that dam. The memorandum will: describe the action, FOP or BiOp measure addressed; how the action may impact fish; and how the action has been designed to minimize impacts. NOAA Fisheries will provide concurrence or recommended changes in an e-mail response. This coordination process is described in a letter to Brigadier General Carl A. Strock from Brian J. Brown, U.S. Dept. of Commerce, NOAA, National Marine Fisheries Service, dated June 5, 2001. A copy of this letter is available from the District Biologist.”

Reason for Change: I don't think this process was intended as a TMT coordination process. It was intended to cover any actions that would cause violation of FPP criteria or BiOp requirements. This function is now largely (or completely) covered by the Official Coordination Request process described above. Unless there is another reason, this paragraph can be deleted.

Comments from others:

Record of Final Action: Approved at January 2009 meeting.
