

MEMORANDUM FOR THE RECORD

SUBJECT: 14BON39 MFR –Sockeye Salmon mortality at Bonneville’s Adult Fish Facility (AFF).

On 19 July, University of Idaho personnel informed project fisheries that a Sockeye Salmon mortality was found on the valve 15 trash rack. Although they were not sampling salmonids, they cleared the trash rack to prevent build up of mortalities. Due to the decomposed state of the fish it was not kept for bio-analysis by USFWS in conjunction with the USGS and CRITFC.

Information collected is provided below:

- A. Species – Sockeye Salmon (*Oncorhynchus nerka*),
- B. Origin – Unknown (adipose present).
- C. Length – 36.5 cm.
- D. Marks and tags – No marks or tags were present.
- E. Marks and Injuries found on carcass – No marks and/or injuries were present.
- F. Cause and Time of Death – Unknown.
- G. Future and Preventative Measures – Unknown.

Sincerely,
Bonneville Fisheries
