

MEMORANDUM FOR THE RECORD

SUBJECT: 22BON025 Bradford Island Tube Trap Lamprey Mortality

On Thursday morning 30 June 2022 Columbia River Inter-Tribal Fish Commission (CRITFC) staff found one Pacific Lamprey mortality in one of the Bradford Island tube traps. The fish was collected at Bonneville Dam on 30 June for the CRITFC-Tribal translocation program. The cause of death is unknown, the fish showed no injuries or external indication of disease. Photos of the fresh mortality were taken at the time of removal from the trap and are attached. The individual was frozen for potential future pathogen evaluation.

- A. Species – Pacific Lamprey (*Entosphenus tridentatus*)
- B. Origin – unknown
- C. Length – 26”
- D. Marks and tags – none
- E. Marks and Injuries found on carcass – none
- F. Cause and Time of Death – unknown
- G. Future and Preventative Measures – none

Sincerely,
Project Fisheries

The U.S. Army Corps of Engineers is reporting on the incident reported by CRITFC and the potential impacts to fish and/or fish passage conditions at Bonneville Lock & Dam. This incident is not the responsibility of the Corps. We report it here for regional awareness.
