Subject: [EXTERNAL] Re: FPOM: MFR 15TDA03 fish unit forced outage

No additional comments other than to say it is interesting to see the words "both fish units" and "catastrophic failure" in the same Corps sentence after the long fight to get the emergency AWS system off the shelf and into the design/construction phase. I hope they can figure out what the underlying problem is with these units. I don't see the need to discuss further other than an update at FPOM. Gary
