

MEMORANDUM FOR THE RECORD

SUBJECT: 15TDA11 MFR – Turbine 19 dewatering steelhead/sockeye mortalities

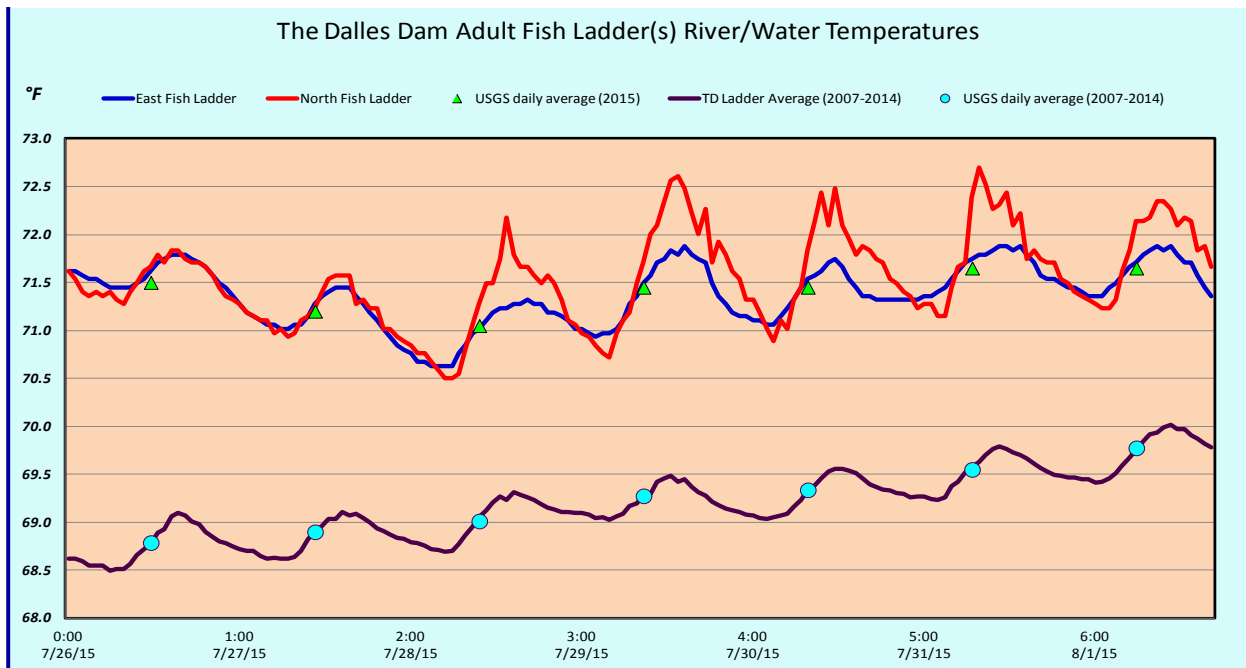

Main unit 19 was dewatered for overhaul maintenance on Aug 4. Fisheries entered scroll case as soon as accessible. Three dead juvenile steelhead (hatchery) and 1 dead juvenile sockeye was found atop the drain grate. These fish may have been dead prior to dewatering. Six live steelhead were removed and release to river, however 2 of those were dying upon release. Adequate water was provided throughout transport. Procedures were following and access into this area was timely. Transport to river was within 10 minutes. Possible cause could be combination of warm water and handling.

- A. Species – Sockeye, Steelhead
- B. Origin - hatchery

- C. Length –NA
- D. Marks and tags - None
- E. Marks and Injuries found on carcass – none

- F. Cause and Time of Death – Unknown
- G. Future and Preventative Measures – None. No procedural changes were determined needed.

Recent water temps;
