

MEMORANDUM FOR THE RECORD

SUBJECT: 18TDA05 - Spillway Closure for Distressed Boat

On May 31, 2018 at ~1600 a boat in distress was observed in the boat restricted zone in the forebay above the spillway. This resulted in an emergency closure of the entire spillway. Flow was immediately diverted to the powerhouse resulting in exceedance of 1% efficiency on most units during this time. The boat eventually made contact with spillgates #3 and #4. Project Resource staff was immediately deployed to rescue the distressed boat. The spillway was returned to service in approximately ½ hour. Spillgates #3 and #4 were held closed for another 10 minutes for quick inspection prior to reopening. All systems were returned to original operating condition.

- A. Species – NA
- B. Origin – NA
- C. Length – NA
- D. Marks and tags – NA
- E. Marks and Injuries found on carcass – NA
- F. Cause and Time of Death – NA
- G. Future and Preventative Measures – No change in response. Project acted fast, prevented loss of life and quickly returned to normal ops.

Sincerely,
Project Fisheries
