

MEMORANDUM FOR THE RECORD

SUBJECT: 22TDA09 *Gatewell salmonid mortality*

On 8 Jun, while doing gatewell inspections a salmonid mortality was observed inside a cross support of a bulkhead in gatewell 9-1. It appears to have become stranded as water level receded. This is a rare occurrence in these locations. Speculation is this could be a result of recent very rapid forebay fluctuations seen daily.

- A. Species –appears Chinook from distance
- B. Origin –NA
- C. Length –NA
- D. Marks and tags –NA
- E. Marks and Injuries found on carcass –NA
- F. Cause and Time of Death – likely stranding
- G. Future and Preventative Measures –no changes planned at this time.

Sincerely,
Project Fisheries
