SCIENTIFIC TAKING PERMIT FOR FISH

ACTIVITY: Lamprey Brood Collection

PROJECT LEADER: Aaron Jackson
Confederated Tribes of the Umatilla Indian Reservation
DNR Fisheries Program
46411 Timine Way
Pendleton, OR 97801
PHONE/FAX: (541) 429-7281 desk, (541) 969-6254 cell

PERMIT NUMBER: CTUIR2017-03
DATES: May 1, 2017-Mar. 31, 2018

FEDERAL AUTHORIZATION: CTUIR currently has a no effect ruling from NOAA per Rob Clapp. CTUIR has Section 10 coverage from the USFWS, Permit # TE-844468-8

NAME OF PROGRAM MANAGER:
Gary James

NAME OF COLLECTOR:
Aaron Jackson, Tony Montoya, Kanim Moses
Jerrid Weaskus, additional seasonal employees

SIGNATURE: 

SIGNATURE: 

GENERAL CONDITIONS AND AUTHORIZATION OF THIS PERMIT:

1. This permit cannot be used in lieu of any permit required by federal law or regulation. Permission to sample in areas where federally protected fish may occur is contingent upon the permittee obtaining necessary authorization from the federal agency and acting in accordance with the conditions established by the federal government.
2. This permit must be carried by authorized collector(s) on site while sampling. Persons not named above may assist in collecting only while accompanied by authorized collector(s) listed above.
3. Access to private property is contingent on the permission of the landowner.
4. Local state Fish and Wildlife co-managers shall be notified (copy of this permit) one week prior to sampling activities.
5. No protected species may be taken unless specifically listed below and any other necessary federal authorizations have been granted.

SPECIFIC PURPOSE, CONDITIONS AND AUTHORIZATION OF THIS PERMIT:

1. Target species to be collected: Adult Pacific Lamprey
Action: Collect up to 1248 adults for continuation of Umatilla Basin lamprey re-introductions.

PERMIT NUMBER: CTUIR2017-03

2. Collection location(s): Bonneville Dam, The Dalles Dam, and John Day Dam
3. Project purpose: To continue re-establishment of Pacific lamprey to self-sustaining, harvestable levels in the Umatilla Basin through approved adult translocation.
4. Collection method: At Bonneville Dam, CTUIR would collect lamprey from traps operated by CRITFC staff at Bonneville. At The Dalles and John Day Dams, CTUIR would both collect lampreys from each fishway during winter maintenance/dewaterings that are conducted by USACOE employees; and utilize traps to fish picketed lead areas for adult lampreys. Collected lampreys will be transported in an insulated 300 gallon slip tank to the South Fork Walla Walla Adult Holding Facility and then transferred to Minthorn Springs on the Umatilla River in the fall 2017 to be held until outplanting in spring 2018.
5. Release locations: Near Bear Creek confluence in the Umatilla River, near Camp Creek confluence in Meacham Creek, and near Little Iskúultpe Creek confluence in Iskúultpe Creek, near Starkey Weir in the Upper Grande Ronde, near Catherine Creek State Park on Catherine Creek and in Lookingglass Creek.
6. Take of incidentally caught ESA fish is to be avoided. Handling of any incidentally caught ESA listed fish shall be minimized to reduce stress. CTUIR staff would have no contact with ESA listed fish for this activity.
7. Indirect mortality may not exceed 5% of the total sample taken for any species at any site.
8. A take report for all species captured or handled will be filed with appropriate coordinating agencies upon completion of this work within the calendar year in which it takes place. Final results will also be available through annual progress reports.
