RE: NOAA Fisheries Access to Bonneville Project

The purpose of this letter is to request continued access to the Bonneville Project in 2017, specifically the Juvenile Fish Monitoring Facility (JFMF). Access is needed to conduct the following COE Walla Walla District study:

1) Separation-by-code recapture and collection of biological data from wild Chinook salmon and wild and hatchery steelhead.

Our Bonneville Project POC is expected to be Ben Hausmann (541-374-4598) or Ida Royer (541) 374-2541. We are aware of the pre-project documentation required of researchers working at Bonneville Project. This documentation will be provided to Tammy Mackey, Ben Hausmann, and Ida Royer. Thank you for considering our request for project access.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tiffani Marsh".

Tiffani Marsh
Supervisory Research Fishery Biologist
