Cascade Locks, OR 97014

May 7, 2020

Dear Operations Project Manager:

The Nez Perce Tribe Department of Fisheries Resources Management (NPT DFRM) is implementing a Pacific lamprey (*Entosphenus tridentatus*) translocation initiative. This effort is intended as a safety net for the Snake River segment of their distribution, within the Nez Perce Tribe's 1855 Treaty Area. Pacific lamprey are a culturally important resource of the Nez Perce Tribe. We are again requesting concurrence from the USACE to collect adult Pacific lamprey at Bonneville Dam during the 2020 lamprey migration season. We will be applying for ID badges and forwarding documentation to appropriate USACE staff in accordance with the Guide for Fisheries Research at Bonneville Dam, along with a work plan and hazard analysis.

Our translocation initiative includes collecting adults for outplanting in the Snake River Basin. Personnel from the NPT DFRM desire to enter the project to collect live adults trapped by Columbia River Inter-Tribal Fish Commission (CRITFC) staff that will be trapping adults at strategic fishway locations. Our goal is to collect up to a total of 1,952 adult Pacific lamprey at lower Mainstem Columbia River Dams (Bonneville, The Dalles and John Day) during 2020. The target number of adults collected at Bonneville is up to 976 fish. Fish collected at Bonneville will be transported to our holding facility at The Nez Perce Tribal Hatchery at Tribal Unit 1705, near Lenore, Idaho. The NPT DFRM will obtain all applicable permits for this activity. We have been and will be coordinating our planned collection efforts with USACE Columbia River Coordinator Erin Kovalchuk, USACE Fish Facility Biologist Andrew Derugin, USACE Fish Field Unit Biologist Nathan McClain, the CRITFC trap collection staff, and Fisheries staff from the Confederated Tribes of the Umatilla Indian Reservation and the Yakama Nation.

We appreciate the cooperation the USACE has provided during past (2006-2019) lamprey collection activities. Please respond regarding our needs to access the Bonneville Dam facility to collect adult lamprey to the following: Tod M. Sween, NPT Department of Fisheries Resources Management, 45559 Highway 12, Orofino, Idaho, 83544 (email: [tods@nezperce.org](mailto:tods@nezperce.org)/telephone: 208-621-3582).

Sincerely,

Tod M. Sween  
NPT DFRM Lamprey Translocation Initiative Program Lead
