**July 9, 2018**

**MEMORANDUM FOR THE RECORD 18 DWO**

**SUBJECT: DWO Commissioning Testing**

On Friday, July 6, commissioning and return to service testing of Unit 3 at Dworshak was completed. SNL occurred on June 27, July 1, July 2, July 3 as the testing was underway. Monitoring occurred on June 27, July 1-3, 6 to observe testing activity for any potential fish impact from the operations. Fish presence was noted in the tailrace on June 27, July 1, July 2. No fish mortalities were observed throughout the testing. Operation of selector gates in overshot mode was only used on June 27 due to concerns with impacting rearing water temperature at Dworshak Fish Hatchery on the other testing dates.

A. Species – presumed adult Chinook
