MEMORANDUM FOR THE RECORD 18 LMN 05 Spring to Summer Spill Pattern Transition

SUBJECT: Transition from Spring Uniform Spill to Summer Bulk Spill brief delay.

Per Summer Fish Operation Plan (FOP) and CBT LMN R 061918 entitled FOP Summer Spill for Fish Passage, Lower Monumental was to transition from gas cap spill in the uniform fashion to a straight 17 KCFS at 00:01 June 21, 2018. This transition occurred at 00:01 per directive, however due to a lack of clear guidance in the Summer FOP and in subject CBT above, spill transitioned to a spill of 17 KCFS in the uniform pattern rather than the normal bulk pattern. After consultation with RCC, Lower Monumental transitioned to a summer spill of 17 KCFS bulk pattern at 07:17 June 21, 2018.

The Project requests that for 2019 Summer Spill, that the FOP specifically designate the spill pattern to be utilized during transition.

Sincerely,
Chuck Barnes & Sarah Wilson
Project Fisheries & Chief of Operations
