#### 2. MAINTENANCE ACTIVITIES:

- a. Auxiliary Water System Closures.
  - (1) FV3-7 was closed for cleaning from 0710 to 0800 on 08 May and from 0815 to 0830 on 13 May.
  - (2) FV3-9 was closed for cleaning from 0710 to 0800 on 08 May and from 0759 to 0805 on 13 May.
- b. <u>STS/VBS inspections.</u> None.
- c. <u>Dewatering and Fish Salvages.</u> None.

#### 3. RESEARCH:

- a. CRITFC Adult sampling. Annual adult sampling in the AFF began on 17 April.
- b. NOAA PIT evaluation. A biological study of the B2CC PIT antenna occurred 24-28 April.
- c. Normandeau Fish counting. Visual counting began on 01 April.
- d. <u>PNNL FGE testing.</u> A hydroacoustic study at the PH2 gatewells as part of biological testing of the FGE mods began on 10 April.
- e. <u>PSMFC Smolt Monitoring.</u> SbyC is active for NOAA. 200 yearling Chinook and steelhead were examined for GBT: seven fish (3.5%) were observed with symptoms. Fallbacks recorded crossing the separator bars: 27 steelhead and 6 unknown salmonids. More details can be found on the FPC web page.
- USDA Pinniped and avian hazing. Deck-based pinniped hazing began 01 March, avian hazing on 01 April.
- g. <u>USFWS Fish Health Survey.</u> Juvenile and adult shad, and juvenile hatchery Chinook will be collected from the fish facilities as part of the annual survey. BON mortalities will also be sent to the USFWS for pathogen analysis.
- h. <u>UI Video monitoring.</u> A DIDSON camera study began in late April to monitor fish in the UMT junction area near the new LPS extension.

#### 4. FISHWAYS:

a. Project biologists inspected 07 – 13 May.

b. Fish passage plan observations.

- (2) FG3-3 is currently open and unplugged. The diffuser cannot be repaired until the north PH1CC area is dewatered. The next opportunity will be the 2017-18 winter maintenance period. It should be closed below tailwaters of 8.2' msl.
- (3) The FG3-4 diffuser shaft was found to be vibrating unusually. The diffuser was closed on 29 Dec 2017 to prevent further damage to the gate. The next opportunity for repair is the 2017-18 winter maintenance period.
- (4) FG3-8 was found to be banging loudly on 11 May. It was closed until repairs can be made. It should be open above tailwaters of 28.2' msl.
- (5) FG3-5 has been repaired.
- (6) Bonneville had the majority of its avian lines broken due to the ice storm (not including the lines that were already removed for the spillway work). These broken lines will be replaced when high flow conditions reduce to a level that allows safe access to these tailrace locations.

#### c. Adult Fishways.

- (1) The AFF remains in service.
- (2) Sensor calibration occurred on 11 May.
- (3) SLEDs are installed in all fishway entrances.

#### d. Juvenile Fishways.

- (1) The ITS remains in service.
- (2) The hydro-cannon is on.

- (3) The B2CC remains open.
- (4) The DSM remains in service.

## e. Lamprey Fishways.

- (1) The Bradford Is, Cascades Is, and WA shore AWS LPSs remain in service.
- (2) The NDE LFS/LPS remains out of service until pumps are installed.
- f. Avian Monitoring. Bird counts are made between 01 April and 31 October.
