#### JOHN DAY DAM

JD/WC Project-Fisheries P.O. Box 823 Rufus, Oregon 97050 Phone: 541-506-7860

All JD Fishways are inspected once per day during winter maintenance, Dec. 1 - Feb. 28. Frequent monitoring of the PLC displays in SMF Fisheries Office as necessary.

#### SMOLT MONITORING FACILITY

#### **Operation:**

Planned RTS is 1 March with first sample date on 2 March 2019. A possible one week delay in RTS due to the inclement, winter weather is considered. SMF has cold sensitive pipes and valves which could be damaged in freezing temperatures if charged with water. Also, ice and snow accumulation on SMF gratings and staircases create unsafe walking conditions for personnel.

#### Maintenance:

SMF SCADA update by JD Electrical/ Portland District's engineers is underway but its completion is delayed by one year to February 2020. Due to complexity of electronic components and incomplete as-builts which are pending at this time. Research: None

#### **ADULT FISHWAYS & TW AVIAN GRID**

#### Birds:

Bird numbers have declined significantly due to low juvenile shad abundance in winter. See Avian Numbers tab for details.

All 125 avian lines in place without any deficiencies.

#### **Operations:**

JD North in service since 1/17/19 with 5 out of 6 AWS pumps available (#2 OOS due to oil leak.) Additionally, two more pumps are frequently OOS

short term due to SKF alarms. Their auto greasing device needs minor mechanical service before returning to service (long term problem.)

MU Gatewell Drawdown All MUs trashrack differentials are 1.5' or below according to twice a week inspections.

#### Maintenance:

JD North AWS pump 2 OOS due to oil leak since 2/9/19, it needs its motor replaced (spare one is on hand.) Planning for its repair underway. JD North AWS pumps frequent SKF alarms (auto greasing issues) continue and are cleared by JD Maintenance & Ops immediately. Planning for a long term fix underway.

JD North Fishway's LPS improvements contract is complete. LPS is expected to go into service in May 2019.

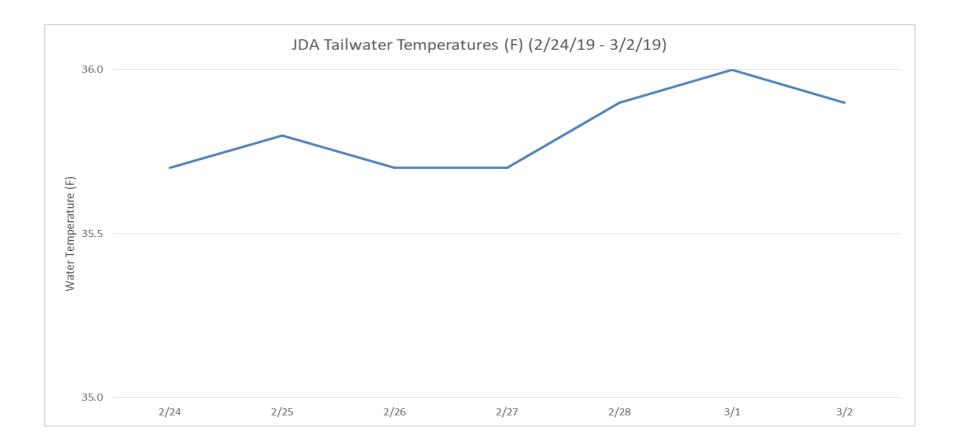

JD South AWS turbine 1 is OOS, in poor condition and urgently awaiting its overhaul as soon as \$ 3 million becomes available (?) Calibration: All gauges/ sensors are within the criteria of 0.3'.

#### Research:

JDS and JDN Adult PIT systems are in service and detecting PIT tags since 3/1/18.

Uof I crew continues monitoring the RT Adult Lamprey passage at both JD Adult Fishways.
