Management Division

Dear Willamette Fish Facility Design Work Group:

The U.S. Army Corps of Engineers, Portland District (Corps) draft 60% Design Documentation Report, "Phase 2 of Downstream Fish Passage – Floating Screen Structure", is available for your review and comment.

This Design Documentation Report is part of the Corps' ongoing efforts to implement downstream passage and temperature improvements within the North Santiam River in response to RPAs 4.12.3 and 5.2 in the National Marine Fisheries Service July 11, 2008 Willamette River Biological Opinion.

Thank you to those who provided comments on the Corps' draft 30% Design Documentation Report, "Detroit Floating Screen Structure". We concur with most of your comments and have incorporated them into the 60% report. Specific responses to your comments are being provided in the accompanying email.

Your review of this draft report is very important. The comment period is now open. You may send your written comments to Jon Rerecich at 503-808-4779 or at jonathan.g.rerecich@usace.army.mil by July 20, 2018. Thank you for your continued participation in the Willamette Action Team for Ecosystem Restoration.

Sincerely,

for Joyce E. Casey
Chief, Environmental Resources Branch
