

Weekly Summary
West Region SHG
September 04, 2015

Bandon

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.

Cole Rivers

- Started marking the 5215 StS
- Hauled the last stocking of the year for Upper Rogue legals
- No near misses or injuries this week

Elk River

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.

Leaburg

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.

Marion Forks

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.

McKenzie

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.
- Hatchery has been without internet connection all week.

Minto

-

Species	Weekly Total	Cum. Total	Recycled/outplanted	Rel. Upstream
STW	0	186	0	186
StS	7	261	298	0
CHS	501	3594	0	1123

- Adult collection has picked this week, USACE will start lowering temp. to below 60 this week.
- Crew spend numerous hours stocking and maintaining the display tank at state fair.

Roaring River

- From Aug. 29th through Sept. 4th we have received 1.7" of rainfall. The rain was very welcome as we were stretching the available water as far as it could go. We rely on 100% reuse water this time of year for 147,000 of our Rb and StS. We have been able to increase flow to ponds that needed it, and are hopeful that the river level will not drop back to its previous level.
- We are continuing to treat the 2415 and 3315 StS for Ich. The treatments are going well but the fish are still flashing, we haven't seen any loss from the Ich. but the fish are not acting normally. We are optimistic that the treatment will be effective.
- Our lib. truck had one tire replaced by Les Schwab due to being really worn and weather checked. The tire had been on the truck since 1997.
- We put together a bulk order of Smith Root electro. fish handling gloves. All together between RR, Cole Rivers, Trask, and the Mid. Coast STEP program we ordered 11 pairs and received a 15% discount.
- We have been busy painting buildings and preparing spawning equip. as time allows.
- We took a load of non-chlorinated ice to the State Fair to bring down the temp. of the ODFW aquarium due to a fish dying and clogging the chiller inlet. The fish had been removed and the chillers were operating, but the temperature had gone up to 79 degrees during the time the chillers were off. The temp. was down to 66 when we arrived, and the remaining fish looked o.k.

Rock Creek

- No Hot Topics to report, just routine fish culture, liberations, and maintenance.

S. Santiam

- The Foster Trap was operated on Tuesday of this week. All unmarked ChS are now being held until water temps drop.

Species	Weekly Total	Cum. Total	Recycled*	Rel. Upstream
StW (2415)	0	129	Na	129
StS (2416)	2	469	51	Na
ChS	80	6220	2437	445

- *StS recycled numbers are cumulative and include reruns.
- DEQ samples were taken this week.
- We are preparing for our first CHS spawn next week.
- General fish culture duties, end of the month reports and maintenance rounded out the week.

Willamette

- We went to Dexter this week and got another 300 females. Fish are starting to ripen up so we are going to spawn next week.
- Rainbow releases for the week: Faraday and N.F. Res.
- All counts were taken and monthly paperwork done.
- Sarah was here this week to look over our fish. She found a couple Ich on the smaller STS. Another parasite we haven't seen here in a long time if ever. We treated them and will monitor.
