

Weekly Summary
West Region SHG
November 28, 2014

Bandon

- No hot topics for this report

Cole Rivers

- We hauled the excess adult 5215 StS to Modoc and Touvelle release sites on Friday.
- The work is getting really close to being completed on the new troughs.
- No injuries or near misses this week.

Elk River

- No hot topics for this report

Leaburg

- No Hot Topics to report

Marion Forks

- Pretty slow week with most of the crew off for hunting or the holiday.
- We started Otolith marking the ChS sac fry for the N. Santiam and Molalla releases.
- We hope everyone had a safe Thanksgiving.

McKenzie

- Two journalism students from U of O came out to the hatchery to do a person of interest interview with someone from the hatchery. Kurt K. was the person, the students went away with a better understanding of what we do here at the hatchery and why a person chooses this type of career.
- All winterization of pumps, valves, etc. were completed over the last couple of weeks, many other maintenance tasks have taken most of our time. Treating all residence roofs for moss, leaf and debris cleanup is also in great shape until the next big blow.
- The last group of eggs will receive their last otolith mark on Saturday. We will continue to run the chiller for a few weeks longer to help bring all egg groups closer together for ponding convenience in January.
- We held our monthly Safety Meeting on Tuesday, we discussed winter temperature concerns, chemical tracking and awareness when using all of the chemicals.

Minto

- No hot topics for this report

Roaring River

- We sorted on Monday and had 80 ripe 3 year olds and 45 ripe 4 year old brood. We started alternating egg takes each week between the 3 and 4 year old brood trying to get bigger egg takes. On Tuesday we spawned the 4 year old brood and took 830,000 eggs. Egg take to date: 4.4 million.
- Our first group of eggs was pulled out and shocked this week. They will be picked and inventoried over the weekend. They are bound to Alsea next week.
- The Stw and Sts were treated for trich with formalin as recommended by Banner. Treatments went well. The spawned out 3 year old brood were treated with formalin for fungus.

Rock Creek

- No hot topics for this report

S. Santiam

- No hot topics for this report

Willamette

- No hot topics for this report
