DRAFT Meeting Agenda

Meeting Purpose: To review and refine alternative operations for improving downstream fish passage at Lookout Point and Dexter dams. Provide any revisions for management consideration.

1. Briefly review Lookout Point Reservoir and Dam configuration, operations, and operational constraints.
2. Briefly review operational alternatives developed by the RM&E Team in the Middle Fork RM&E Plan for improving downstream fish passage.
3. Review specifications of the proposed full drawdown and hypothesized effects on fish passage, and potential options to improve feasibility for implementation.
4. Discuss/develop any new potential alternative operations for evaluating as potential long-term solutions for fish passage.
