

### Fish Passage Plan (FPP) Change Request Form

---

**Change Form # & Title:** 16LGS002 – Cold Weather  
**Date Submitted:** December 22, 2015  
**Project:** LGS  
**Requester Name, Agency:** Corps RCC  
**Final Action:** **APPROVED – January 28, 2016**

---

**FPP Section:** LGS section 2.3.3.2. Operating Criteria - Juvenile Fish Facilities – Fish Passage Season (Apr 1-Dec 15) – ESBS, VBS, and Operating Gates

**Justification for Change:** All four Lower Snake projects have a section defining “cold weather” criteria that would trigger pulling screens before December 15. Each project says the same thing in slightly different ways. This standardizes the language for all projects and adds a link to the specific forecast for that project.

**Proposed Change:**

**2.3.3.2. STS, VBS, and Head Gates.**

xiv. When extreme cold weather is forecasted to occur for an extended period of time (defined as forecasted temperatures <20°F for ≥24 hours) between Thanksgiving and December 15, ESBSs and STSs may be removed. The project will first request special permission from CENWW-OD-T. CENWW-OD-T will inform NOAA Fisheries and ~~other FPOM participants of the action.~~ “Cold weather” is defined as: ~~forecasted daily high temperature below 20°F for ≥24 hours as forecasted for the Little Goose Dam area by~~ NOAA’s National Weather Service forecast for Little Goose Dam is available at: [www.weather.gov](http://www.weather.gov).
