

Fish Passage Plan (FPP) Change Form

Change Form # & Title: 24JDA006 - Adult Fish Collections Systems
Date Submitted: 29-JAN-2024
Project: John Day Dam
Requester Name, Agency: Eric Grosvenor, USACE
Final Action: **FINALIZED 1-FEB-2024**

FPP SECTION: 3.1.6 “Fish Facilities Routine Maintenance”

JUSTIFICATION FOR CHANGE: During the winter maintenance period, the adult fish collection systems are dewatered if possible, if not, a ROV is used instead of a diver where possible due to safety concerns.

PROPOSED CHANGE: *Edits to existing FPP text in “track changes”.*

3.1.6. Adult Fish Collection Systems. Preventive maintenance and repairs occur throughout the year as needed. During the adult fish passage season, this maintenance will not result in failing to achieve fishway criteria unless coordinated with FPOM. During the winter maintenance period, an inspection will occur through dewatering or underwater divers or ROV, per discretion of the Project Biologists. One additional underwater diver/ROV will occur August 1-15. Timing of this inspection will be coordinated through FPOM. The Project Biologist or alternate Corps fish personnel will attend all dewatering and inspection activities potentially involving fish (**section 5**).

COMMENTS: None

RECORD OF FINAL ACTION: Finalized at the FPOM FPP meeting 1-FEB-2024
