

## Fish Passage Plan (FPP) Change Form

---

**Change Form # & Title:** 25IHR005– Orifice Backflush  
**Date Submitted:** 13-DEC-2024  
**Project:** IHR  
**Requester Name, Agency:** Ben McArthur, USACE  
**Final Action:**

---

**FPP SECTION:** Chapter 6 (IHR), section 2.3.2.3.v.

### **JUSTIFICATION FOR CHANGE:**

Ice Harbor generally has very little debris (often less than 10% coverage in the gatewells and under 25 square yards in the forebay) even during high debris passage periods.

**PROPOSED CHANGE:** *Edits to existing FPP text in “track changes”.*

### **2.3.2. Juvenile Facilities – Fish Passage Season.**

#### **2.3.2.3. Collection Channel.**

v. Backflush orifices at least once a day. During periods of high fish and debris passage, April 1–July 31, inspect ~~and backflush~~ orifices once per 8-hour shift ~~and backflush as necessary if there is any indication of buildup.~~ Inspect and backflush ~~or~~ more frequently as determined by the Project biologist to keep orifices clean.
